flee terror stricken to the mountains upon feeling the tremor of a slight earthquake as did some of the habitues of Oakland and other California towns, what will shall come:

A GIANT OF THE WEST. The Marvelous Growth of Wichita and Its Promising Future.

There is a town in southern Kansas that challenges the world to bring out itsequal The marvelous growth of Wichita is one of the most wonderful of many wonderful happenings in the great west. Where to day a metropolitan city shelters 40,000 people, a score of years ago was a vast written up a number of manufacturing stretch of prairie land. In 1879 an eastern concerns of this city, fifteen or twenty journalist took up his abode on these in all, which work has gone far in con- plains and soon informed the civilized world that a new metropolis had been states of the present importance of born on the banks of the Arkansas river. Wichita as a manufacturing center, In a short time in rudely constructed huts hundreds of fortune seekers had made their homes and started that booming business which has brought wealth to been alluded to. This morning we have a result of this twenty years of booming, the pleasure of laying before our readers | Wichita has 40,000 inhabitants, magnifione of the largest and most important cent business blocks, electric lights, and electric railways that takes one miles into the extensive works of the Burton Stock | the suburbs, several huge packing houses, a big area devoted to stock yards, and The state commissioner of industrial seven or eight railways, radiating from the

The airs and conceits of the Wichitans are quite amusing. They have their board of trade, their chamber of commerce, their stock yards, their packing houses, and the establishments and institutions as re- shrewd boomers have so laid out their turned to him. This is a greater number town that it takes almost as long to get of manufactures than is returned by into it by rail as it does into Chicago. One any city in Kansas. The commissioner, cannot but smile to hear the train brakehowever, states that he is satisfied from men roar out the name of the various stahis own personal knowledge, and from tions which must be passed before the other sources, that a large number of heart of the city is reached. There is North Wichita, Oak street, Wichita street and Union depot, The halt at each of these stations never fails to impress the traveler he is correct. Instead of seventy-nine, with the municipal breadth and area of Wichita has one hundred and fourteen, Wichita. True, the city is not solidly as shown by her own local records. built up butween these stations, and here Commissioner Betton, having no and there a clump of trees or a farmyard

even greater things. Millions of eastern capital are invested in its enterprises and Wichita and amuse themselves at the exbe admitted, are building up a beautiful and substantial city. Truly the boom There is a total capital employed in business is a good business.

IT IS NOT A BOOM.

From many sources, through newspavalue of the total product returned by pers and from travelers among our own the old jade at his side, who sports a these seventy-nine industries, foots people as well as from strangers, it is comb presented to her, on the monthly months of quite evident that the impression pre-installment plan, by a joint-keeper, 1889, three million, three hundred vails in many places that Wichita is dressed in and seventy thousand, seven hundred booming. This is a mistake and one liaand sevenly-seven (\$3,370,777) dollars, ble to do this city an injury. There is the total cost of the raw material em- no boom here, nor anything of the charployed being \$1,971,083. The amount acter of a boom. No property is selling paid out for labor in these institutions for a cent more than it is actually worth, sweet old political fraud who has been for eleven months being \$620,750, or, dollar for dollar, either improved or un- astride the neck of the Republican party there was paid out for labor in Wichita improved. Non-resident seeker after investments. how many have you: a hundred? a thousand? a million? The best place on the top side of earth for you to plant them finitely greater and grander; it is bound to be, as sure as destiny can make it so. Besides the superabundant natural resources that only need the touch of man's genius and energy to develop them, this place at 10 cents, city is located in the very midst of the great southwest and is its natural and only commercial metropolis.

This vast territory, larger than Europe less Russia, is comparatively unsettled, but soon it will be sentient with population, wealth and civilization, and to just received. Wichita will it be tributary for its most essential supplies. To be in Kansas at all is to make a living, to go into business secures a competence, and to invest in its soil is to win a fortune.

A BRIGHT PROSPECT.

An era of better times than have ever been enjoyed is just now beginning to make itself felt in Kansas. The late advance in farm products has infused new life into all lines of business, especially among the farmers. The advance in corn from 13 to 23 cents is stimulating a liberal movement in that cereal and an immense amount of it is finding its way market. The acreage put to corn this year will be larger than last, and much of it has already been planted. The growing wheat never gave better abundant fruit crop is believed fully equal to the best the state ever had at
